

Open House

TVA to Hold Open House on Proposed Transmission Project

TVA will hold an open house for public input on plans for a proposed transmission project in the Redstone Arsenal and Huntsville areas of Madison County in Alabama.

The proposed project consists of about 3.9 to 4.5 miles of new 161-kilovolt, single-circuit transmission line to serve Redstone Arsenal. This project would allow for growth and provide more reliable power for the area.

The proposed new line would begin at a point on TVA's existing Guntersville-Farley 161-kilovolt Transmission Line and extend west to the southeast edge of Redstone Arsenal property. The map shows alternative connection points along the Guntersville-Farley Line and the resulting transmission routes that TVA is considering. A more detailed map and additional information can be found at www.tva.com/transmissionprojects

TVA representatives will be available at the open house to provide information, answer questions and receive comments about the project. Large maps showing the alternative locations will also be available. The open house may also be accessed virtually online.

TVA is interested in receiving comments concerning how this project may affect the environment, historic properties or any other issues associated with this proposal. Comments will be used in reaching a decision on location of the new transmission facilities. Any written comments received, including names and addresses, will become part of the administrative record. TVA will analyze the potential impact of this proposal under the National Environmental Policy Act and will minimize potential impacts to the extent practical.

If you cannot attend the open house but have questions or comments, please contact Gina Howard. All written comments on this proposed action should be sent to TVA at the address below no later than April 22, 2024. If you have special needs, please contact Tanya Adams at the toll-free number, at least five days prior to the open house.
