

**Public Comment Period –**

**November 19, 2025 – December 19, 2025**

**Proposed Corrective Measures for Groundwater Contamination at RSA-008.**

Public comments are solicited on the Army's recommendation for corrective measures for groundwater at RSA-008.

RSA-008, Inactive Sewage Treatment Plant #4, is located in the northeastern portion of Redstone Arsenal, within the groundwater unit RSA-145. Sewage Treatment Plant #4 was constructed in 1959 and treated domestic sewage and wastewater until it was removed from service in 1992.

Monitored natural attenuation and land use controls are proposed for addressing groundwater contamination at RSA-008. Natural processes will act to reduce the concentrations of pesticides, arsenic, and trichloroethylene in groundwater to below the cleanup goals. Land use controls will prevent or minimize exposure to contaminated groundwater. Periodic groundwater monitoring will be conducted to track the natural attenuation progress. Closure for groundwater will be achieved when the concentrations in groundwater reach the cleanup goals.

All public comments will be reviewed and considered for the site. The Alabama Department of Environmental Management has granted concurrence with the Army's recommendations. The final decision will be made after any public comments received on this notice and following consideration of comments received during the public comment period on the proposed modification to Redstone Arsenal's Alabama Hazardous Wastes Management and Minimization Act Permit.

Site documents are available for public viewing at the following locations:

- **Huntsville/Madison County Public Library, Heritage Room 915 Monroe Street, Huntsville**
- **Triana Public Library, 357 Record Street, Triana**
